

HR Platform Features

Contributors to the Project :

- Eren Kahraman – Frontend Developer and Project Manager
 - Albert Wanangwa Storey – Frontend Developer
 - Thomas Calonnec – Backend Developer
 - Soner Gezgin – Backend Developer
-

Milestones

- Upload/Download
We have to reach all documents include “Interview Records” from application. So our HR colleagues don’t have to check every time different files.
- Responsive
Responsive design ensures that your website is easy to navigate, read and interact with, regardless of the device used. This improves the user experience and can lead to higher engagement, longer session durations and lower bounce rates.
- New Candidates
We have to fix this problem from data base so we can add new applicants.
- Sending Project-Related Documentation
We have to send an e-mail about documentation after we send acceptance letter. When “status === correct “ for “acceptance letter” it will be go directly.
- Deployment
- We will use one e-mail for each platform (mongodb/vercel/github) and we will backup database
- We have to focus on security as soon as we start to upload documents on deployment

Notes From PM : HR Platform has stages and it should be a social media for companies. As soon as we release our first demo we will have some feedbacks from our HR colleagues. After we fix/implement features, second stage will start. It will be a social media for all departments. They can reach their own task management. We focused on download/upload and fixing adding new applicants for this month. As soon as we finish “upload/download” and “adding new candidates” we will be ready to deployment. It will be finish on 3rd of march. We will start to deployment on 6 of march and deployment will be ready on 13th of march.

To be Developed

(1 sprint = 2 week)

- Collecting github/mongo db/ vercel accounts in one mail.....2 days
- Backup database1 day
- Responsive.....2 weeks
- Interview Records..... 1 day
- Remove “departure” and better page and necessary information about people who finished their internships.....4 days
- Implement task management 1 week
- Automatically sending project-related documentation from the platform to the recipients of the acceptance letter.....2 weeks
- Deployment.....1 week

In Total Time is: **38Days**
